

EARTH AUGERS

BT 121

Don't just make a hole – make a statement. STIHL augers and drills are engineered to stand out from the rest, combining power, portability and precision. Their gasoline-powered engines deliver the force you need wherever the job takes you, especially when electrical outlets are nowhere to be found.

STIHL augers and drills are lightweight and ready to use – and possess the kind of technology that prompt professional landscapers and contractors to choose STIHL for their handheld outdoor power equipment needs.

From mass flower plantings, fence and dock construction, building repair and pest control, even core drilling in concrete, these versatile tools help make life much easier – especially for those working with them.

The BT 121 earth auger from STIHL is packed with power; it's what professionals use on tough terrain or remote jobs where power and light weight are a priority. This lightweight, one-man auger features our exclusive STIHL Quickstop® brake, which is a great feature if you contact a rock, root or other immovable object. When the bit hits a rock, the BT 121's STIHL Quickstop® brake activates and stops the bit from rotating, while the powerhead on most other augers continues to turn. The quick action of the STIHL brake is something your arms will appreciate when working in rocky or heavily wooded sites. The BT 121 is also equipped with transmission lock-out for easy starts and easy “back out” if the bit gets stuck. Double gear reduction gives this auger great drilling performance. With the brake, an advanced vibration dampening system and large hip pad, you get power, performance and comfort.

BT 360

The Stihl BT 360, big brother to the popular BT 121 one-man auger, is used to drill holes up to 350 mm in diameter for erecting fencing, prefab walls, telephone or electricity poles, planting trees, installing water or electrical reticulation and taking soil samples.

“As a result of its mobility and portability, the BT 360 also provides an alternative to PTO-driven augers when holes need to be drilled in rough terrain and on hard-to-reach sites. It has for example been used to prepare holes for the installation of telephone and electricity poles in informal settlements.”

The two-men Stihl BT 360 is a robust machine built to withstand high stresses in medium to heavy soils. It has a high-power high-torque 3 kW petrol engine delivering a spindle speed of only 50 rpm, thus ensuring enhanced drilling efficiency.

The distance between the handles and the machine makes it easier for operators to hold the BT 360 and position the drill precisely, while the throttle trigger is located so that the machine can be controlled without moving the right hand. Furthermore, the carrying frame can be folded up in a matter of minutes so that the auger can be transported from site to site in a normal-sized car boot.

BT 45

STIHL offers a lightweight, gasoline-powered wood boring drill that's ideal for building docks, fences or outbuildings. It's also great for pest service and tree service professionals, and for crews constructing docks and retainer walls.

Good news — a lightweight gasoline-powered wood boring drill you can rely on. Ideal for building or repairing docks and bulkheads, fences, retaining walls, Jungle Gym`s, Thatch roof`s, Lapa and other structures, the dependable and powerful BT 45 wood boring drill lets you work in places where electricity isn't available. This well-balanced drill features a primer bulb and throttle lock for easier starting and a compact ergonomic design, making it easy to operate.

The Planting Auger kit enables you to use the BT45 for landscaping, drilling holes for planting trees, mass flower plantings, deep root fertilization or even small to medium aerating tasks.

Standard Features:

- Gasoline-powered engine lets you work outdoors without electrical power
- Dependable, powerful and lightweight engine that features: primer bulb and throttle lock for easy starting, easy-access air filter, electronic ignition, exclusive tool less fuel cap, two-ringed piston, and compact, streamlined ergonomic design that makes it easy to operate
- Anti-vibration system for comfortable use
- Two-speed gearbox, with a neutral position as well as a reverse gear
- Tool less chuck accepts 1/2" drive bits up to 1" in diameter
- Friction clutch is designed to slip if bit stalls
- Balanced design with well-spaced handles
- Front handle is easily adjustable (360° rotation)
- Can be converted to planting auger with kit

SPECIFICATIONS	BT 45	BT 121	BT 360
ENGINE	Single cylinder, 2 stroke, petrol mix	Single cylinder, 2 stroke, petrol mix	Single cylinder, 2 stroke, petrol mix
POWER	0.75 kW / 1 hp	1.3 kW / 1.8 hp	3 kW / 4.0 hp
DISPLACEMENT	27.2 cc	30.8 cc	60.3 cc
MA. DRILL DIA.	25 cm (1")	200 mm (8")	350 mm (14")
WEIGHT (w/o attachments)	4.8 kg	9.4 kg	25.9 kg
SPINDLE SPEED	910 rpm	190 rpm	50 rpm
